G DATA | SIMPLY SECURE

PERFECT PROTECTION FOR BUSINESS

OUR IT SECURITY SOLUTIONS AT A GLANCE

As one of the leading companies in the IT security sector, we can rely on 30 years of experience. This means we are capable of responding rapidly to current challenges and threats. Our business solutions provide security that any business can rely on. They are tailored to specific needs and can be adapted to businesses of any size.

CHALLENGES

- Targeted attacks are on the rise and can lead to high costs
- Cyber criminals are getting ever more professional
- IT security is becoming increasingly complex
- Mobile devices are making networks ever more heterogeneous

G DATA SOLUTIONS

- Constant research and development to respond quickly to new threats
- Effective Cloud- and behavior-based protection against attacks
- Securing of decentralized and heterogeneous networks of any size
- Automated protection for all clients including Mobile Device Management

CUSTOMER BENEFITS

- Effective protection for IT infrastructure
- Protection of intellectual property
- Operating costs reduced
- Risk minimized

We combine award-winning protection with a clear, easy-to-use management console and well-structured, understandable reporting options. This applies for networks of any size – with ten or ten thousand clients. G DATA solutions enable enterprises to effectively protect their IT infrastructure while simultaneously reducing maintenance and administration costs.

STRESS-FREE DEPLOYMENT

G DATA solutions can be installed with just a few mouse clicks. Our easy-to-follow installation wizard provides a smart, fast way to install the core server components. Thanks to the administration interface, deployment is quick even in heterogeneous environments.

REDUCED TOTAL COST OF OWNERSHIP

Our solutions help to reduce total cost of ownership. G DATA Administrator combines all administration options into one user interface. This saves time and money. Administrators of large company networks have a permanent overview and can access all relevant settings as needed, without being restricted by complex menus.

THE PERFECT FIT FOR ANY INFRASTRUCTURE

G DATA solutions offer impressively comprehensive security functions that can be enhanced with additional modules. This enables the security solution to be easily customized and adapted to specific requirements and network topologies.

THE NEW BUSINESS GENERATION 14.0: OUR ENDPOINT SECURITY SOLUTIONS

EASY TO INSTALL: OPTIONAL MODULES FOR ADDITIONAL SECURITY

NETWORK MONITORING

The new Network Monitoring module gives you a perfect overview over your customer networks. Monitor a multitude of devices and services from printers to servers and prevent potential outages ahead of time.

PATCH MANAGEMENT

Vulnerabilities in frequently used software are among the most popular attack vectors. This is why all program files need to be regularly updated. Security gaps are quickly and efficiently closed, thanks to Patch Management.

EXCHANGE MAIL SECURITY

Exchange Mail Security protects emails before they even reach the clients and removes malware and spam from incoming and outgoing emails. Exchange Mail Security supports all Microsoft Exchange Servers (2007 through 2016).

COMPREHENSIVE CLIENT PROTECTION

CloseGap hybrid technology	Maximum protection through proactive and signature-based detection
G DATA BankGuard	Secure online payments – no browser add-on or additional software required
Behavior Blocker	Protects against even unknown viruses
NEW! Protection against vulnerabilities in installed software	Exploit Protection reliably protects the clients against vulnerabilities in installed programs – from text editors to browser plugins
Protection against harmful USB devices	The integrated USB Keyboard Guard reliably protects clients against harmful USB devices masquerading as keyboards
Integrated protection against spam and virus-infected email	Add-on for Microsoft Outlook and for POP3 and IMAP accounts
Powerful firewall	Monitors all incoming and outgoing connections and protects against DoS attacks, portscans and much more
IMPROVED! Antivirus for Linux clients	Protects Linux computers in the company network against Internet dangers. Now with support for even more distributions
NEW! Centrally managed antivirus for Mac clients	Manage the Apple computers in your customer networks comfortably using G DATA Administrator

CENTRAL ADMINISTRATION

Managed Services	Provides the ability to offer lucrative managed services
IMPROVED! Simple administration and fast overview	Central management of installations, virus scans and user permissions
Clear dashboard	User-friendly overview of all relevant information, including context-based help
Remote administration	From anywhere via web interface – even from mobile browsers
Device control	Control who is permitted to use USB sticks, storage cards or burners
Application control	Specify which programs are allowed to be installed or run
Web browsing filter and control of Internet use	Websites can be blocked if required; web browsing time can be restricted
Active Directory integration	Transfer existing group structures and automate client installation
Mobile Device Management	Central administration of mobile Android and iOS devices, with antitheft protection, app checking, corporate phone book, call filter and much more (features can differ depending on the system)
Software and hardware directory	Detailed display of the entire inventory
Support free of charge 24/7/365	Development and in-house support work closely together in our Bochum head office

OPTIONAL MODULES

NEW! Network Monitoring	Monitor the complete infrastructure of your customers, from printers to servers, using individually customizable metrics
Patch Management	Centrally controlled software updates for Microsoft and third-party software
Premium Service & Support	Guaranteed response times and highly specialized support contacts – offer available on request
NEW! Exchange Mail Security	Take advantage of virus protection and AntiSpam for your customers' Microsoft Exchange Server (2007 through 2016)
NEW! Linux Mail Security Gateway	Add virus protection and AntiSpam to your customers' Postfix- and Sendmail-based Linux Mail Servers
NEW! Linux Web Security Gateway	Extend Squid-based Web Gateways with comprehensive protection against viruses and phishing

"WE HAVE THE SAME EXPECTATION OF OUR IT SECURITY AS WE DO OF OUR-SELVES: QUALITY MADE IN GERMANY. THAT'S WHY WE CHOSE G DATA."

Timo Erlemann, Head of IT, Vogler GmbH & Co. KG

	ANTIVIRUS BUSINESS	CLIENT SECURITY BUSINESS	ENDPOINT PROTECTION BUSINESS	MANAGED ENDPOINT SECURITY
	Basic protection for the network	Network protection PLUS firewall and antispam	Complete protection PLUS PolicyManager	Complete protection as a managed service
