

G DATA Antivirus Business

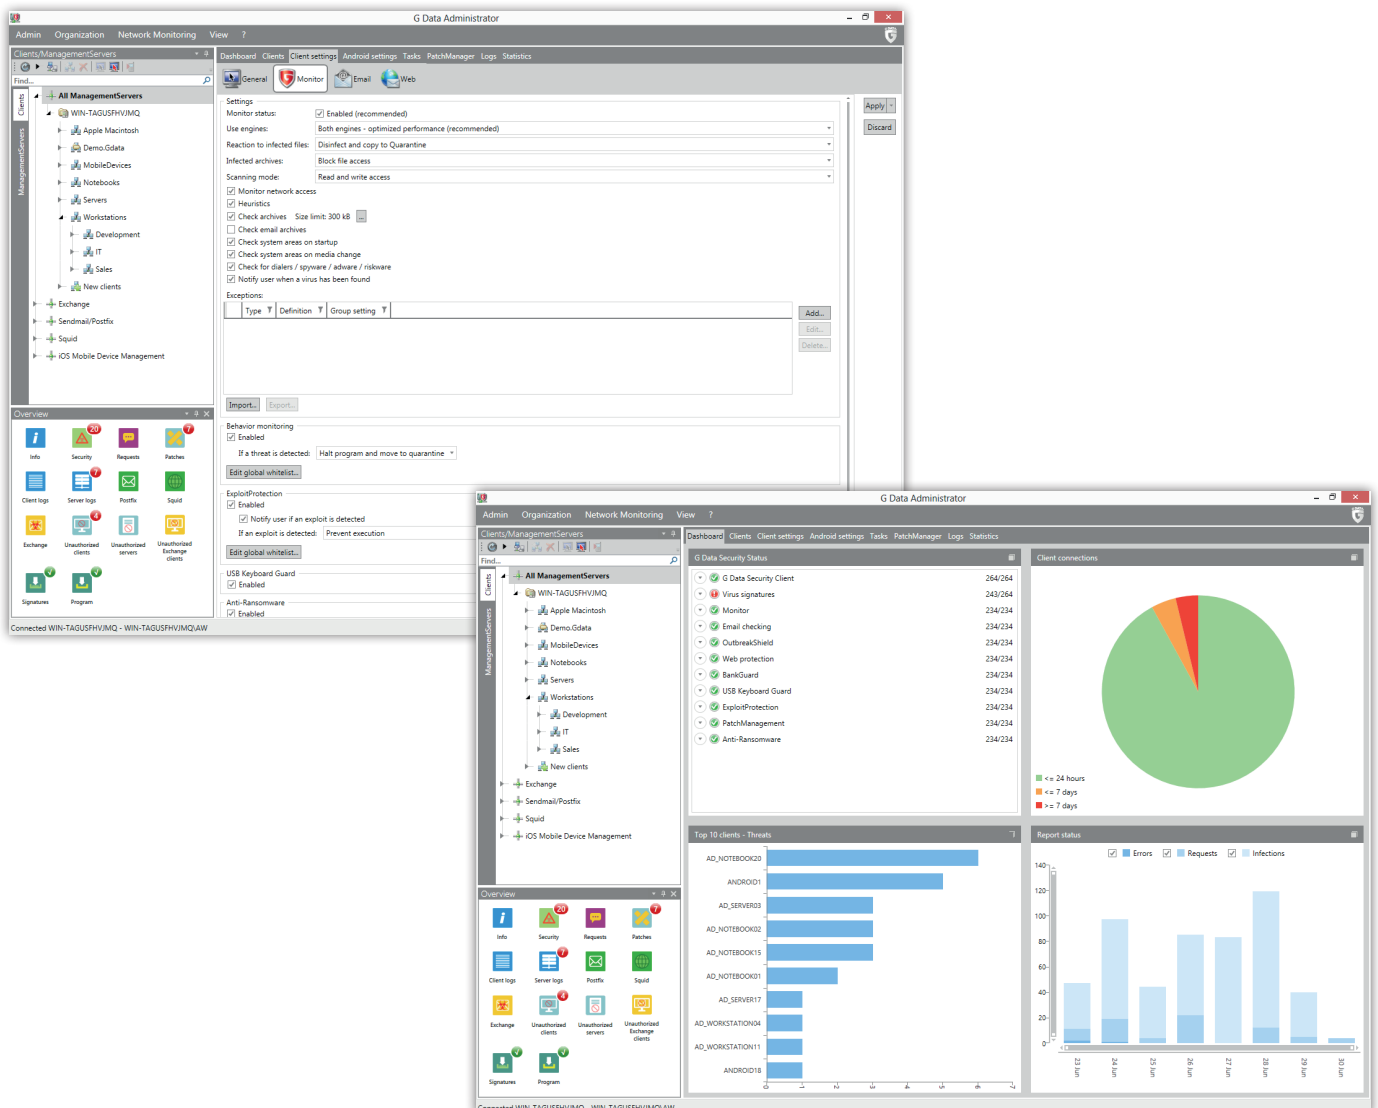

Virus-free clients – for a trouble-free and productive working environment

G DATA Antivirus Business protects your company network using proven, multiple award-winning antivirus technology, central management and automatic protection for all servers, workstations, notebooks, iOS and mobile Android devices.

The optional Network Monitoring module helps you keep track of your complete infrastructure – from printers to servers. Using the Patch Management module you can make sure that the third party software on your clients is up-to-date at all times.

With the Antivirus Business you can manage your Mac clients centrally using G DATA Administrator and take advantage of the integrated Exploit Protection, which protects your computers against vulnerabilities in installed software.

G DATA has been carrying out research for 30 years for your security. The result is exceptional, comprehensive protection for your PC, which is easy to install, simple to operate and offers excellent performance levels.

Basic protection for your network

Comprehensive client protection

CloseGap hybrid technology	Maximum protection through proactive, signature-based detection
NEW! Anti-Ransomware	Protection against Ransomware is now fully integrated and centrally managed to protect your clients reliably against encryption Trojans
G DATA BankGuard	Secure online payments – no browser add-on or additional software required
Behavior Blocker	Protects against even unknown viruses
Protection against vulnerabilities in installed software	Exploit Protection reliably protects your clients against vulnerabilities in installed programs – from text editors to browser plug-ins
Protection against harmful USB devices	The integrated USB Keyboard Guard reliably protects clients against harmful USB devices masquerading as keyboards
IMPROVED! Antivirus for Linux clients	Protects Linux computers in the company network against Internet threats. Now with support for even more distributions
IMPROVED! Centrally managed antivirus for Mac clients	Manage Apple computers in your network comfortably using G DATA Administrator

Central administration

IMPROVED! Simple administration	Central management of installations, virus scans and user permissions
Clear dashboard	User-friendly overview of all relevant information, including context-based help
Remote administration	From anywhere via web interface – even from mobile browsers
Active Directory integration	Transfer existing group structures and automate client installation
Mobile Device Management	Central administration of mobile Android and iOS devices, with antitheft protection, app checking, corporate phone book, call filter and much more (features can differ depending on the system)
Software and hardware directory	Detailed display of the entire inventory
Support free of charge 24/7/365	Development and in-house support work closely together to help you as fast as possible

Microsoft Partner
Gold Application Development

Optional modules

IMPROVED! Network Monitoring	Monitor your complete infrastructure, from printers to servers, using individually customizable metrics
IMPROVED! Patch Management	Centrally controlled software updates for Microsoft and third-party software
Premium service and support	Guaranteed response times and highly specialized support contacts – offer available on request
Exchange Mail Security	Take advantage of virus protection and AntiSpam for your Microsoft Exchange Server (2007 through 2016)
Linux Mail Security Gateway	Add virus protection and AntiSpam to your Postfix- and Sendmail-based Linux Mail Server
Linux Web Security Gateway	Extend your Squid-based Web Gateway with comprehensive protection against viruses and phishing
